## Take control

The new **Alpha** dominates every other laser in its class, combining maximum performance with the best laser features and a great price.

It's the smart choice for:

- Commercial slabs and tilt-ups
- General building construction
- Long range grading
- Smaller projects with tight specs.

Don't settle for less, take control of your jobsite with the **Alpha**.

- High accuracy lets you do your best work
- Superior range covers your biggest jobs
- Slope matching • Elevation alert • Long battery life
- Engineered to survive jobsite use and abuse

### R7 System receiver

The **R7** provides elevation readings for all your jobsite needs. Use it bare to make 4 foot or 1 meter marks, use it with its clamp for form setting, grade checking and many other tasks. The **R7** provides a 5 channel LCD front display, LED rear display and an audio tone to indicate high, low, or on grade.
